might be access from previous user
entire life of subj -
a Celbrated resource.

If they have any suspicions or want any
despite research let Howard
know. Has a Unix Specialist
who can do it but at this
time there is no justification
in Howard's eyes -

(13) If it works out if further research
is required. Lot of work if
there is no need. No identifiable
accounts

(12) None.

[redacted] will be putting his final
Statement of TAR together & forward
to [redacted]
